

Standing strong

The contractor members of **Servicenergy Select**

Independently strong
Together even stronger
Advantage contractor

We are **Servicenergy Select**. We are a group of independent contractors, small and big, and we share two important advantages in common. We have joined together and we are offering a truly measurable service value advantage in our markets. We are locally strong and nationally stronger. We offer *proof-of-performance* service – never before offered.

Whether serving big cities or small towns, we offer the same consistent, performance-based and measured *Rooftop and Split Unit* service value. We call it *diagnostics-based service (DBS)* and *planned diagnostics maintenance (PDM)*. It achieves *efficiency through service (ETS)*. It delivers best performance in terms of BTU, EER and ROI performance. We don't just promise this. We prove it to our clients on every service call. Advantage client. Advantage contractor.

So if you have not yet joined our group and you are committed to delivering *measured value and best service* in the communities you service, we are interested in you. Do your service business a favor! Contact us and schedule your online information exchange meeting today.
